# Connecting To WiFi On Your Personal iPhone or iPad

The wifi network is called **byodscdsb**

After completing these steps and successfully connecting to this WiFi network, you won't have to reconnect every day; your device will automatically connect to WiFi.

# iPhone or iPad

1. Select **Settings**
2. Select **WiFi**
3. Choose a Network > **Other**
4. In Name: type **byodscdsb** then select **Security**
5. **Choose WPA2 Enterprise**, then tap **Other Network** to go back a step
6. Type in **Username** and **Password**
7. You may see **byodscdsb1.scdsb.on.ca Issued by COMODO RSA Domain** (or something similar), select **'Trust'**

**IMPORTANT:** After adding the byodscdsb network to your list, you should “forget” the scdsbgw network; to avoid connecting to it in the future. Go to Settings > WiFi > tap the information icon beside scdsbgw > tap Forget this network
